Thank you
Native Plants in Claremont
for generously discounting the plants by 25% for this sale.

Join the 'Pickering Ajax ButterflyWay' FaceBook Group
for great resources on pollinators and native plants.

Thank you to the David Suzuki Foundation for initiating this national ButterflyWay Program

POLLINATOR FRIENDLY NATIVE PLANT SALE

Why should we plant pollinator friendly plants in our home gardens?

The David Suzuki Foundation says:

-  All creatures that eat plants (including humans!) depend on pollinators.
-  75% of the food we eat — fruits, nuts, vegetables, and herbs — need pollinators to reproduce.
-  Creating hospitable homes for beneficial insects in your garden means they are less likely to move into your house.
-  We have contributed to the decline of beneficial insects – we can help to bring them back
-  A garden that is alive with birds, bees and butterflies is more fun

The plants included in each tray:

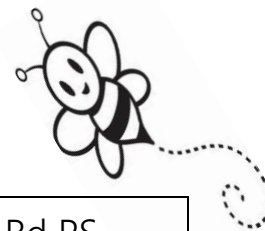

<p>Sun Loving Native Plants (10 plants) </p> <p>2 Upland White 2 Cylindric Blazing Star</p> <p> Goldenrod 2 Hoary Vervain</p> <p>2 Pearly Everlasting 2 Prairie Milkweed</p>	<p>Shade Loving Native Plants (10 plants) </p> <p>2 Wild Ginger 2 Wild Geranium</p> <p>1 Canada Anemone 2 Asters (varying types)</p> <p>1 Bloodroot 1 Great Blue Lobelia</p> <p>1 Bottlebrush Grass</p>
<p>Mixed Sun/Shade Native Plants (10 plants) </p> <p>2 Cylindric Blazing Star 1 Bloodroot</p> <p>2 Harebell 2 Hairy Beardtongue</p> <p>2 Round Headed Bush 1 Grass (varying types)</p> <p> Clover</p>	<p>Most native plant species are considered to be pollinator friendly and water efficient, once established.</p>
